# Instruction to use UniFlash based on MSP430

# 安装

- 下载UniFlash
  - 链接: <a href="https://www.ti.com/tool/UNIFLASH">https://www.ti.com/tool/UNIFLASH</a>
- 建议选择默认路径,不要放在中文路径下。如果最新版本安装有问题建议回滚至上一版本。

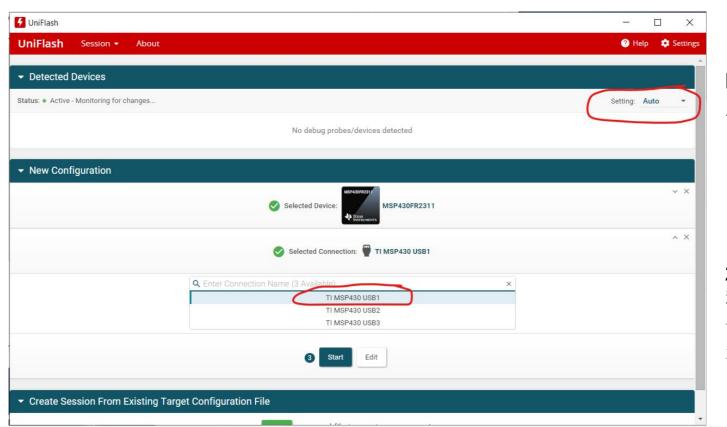

# 用户手册

- 用户手册:
  - <u>UniFlash Quick Start Guide</u>(快速介绍Uniflash的功能)
  - <u>Programming the Bootloader of MSP430™ Using UniFlash</u>(快速介绍如何使用 bootloader的功能)

# 使用MSP-FET / eZ-FET通过JTAG连接

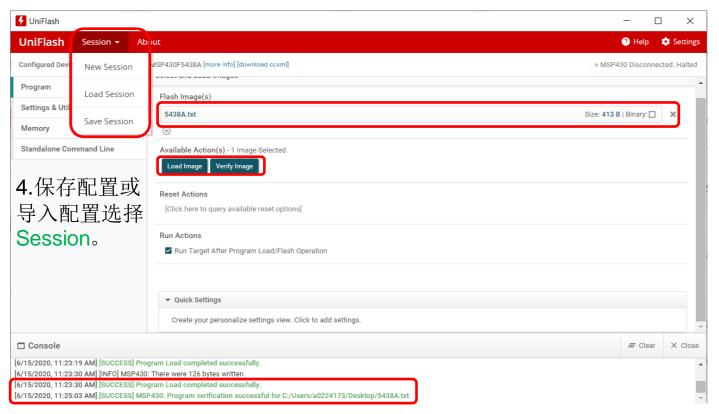

# 1.烧录器选择与MSP430型号配置

1. 如果不想自动检测 MSP430可以把Auto选 成Manual

2. 不论是MSP430的哪种仿真器都选 USB1。 会<mark>自动检测</mark>2线SBW还 是4线JTAG!

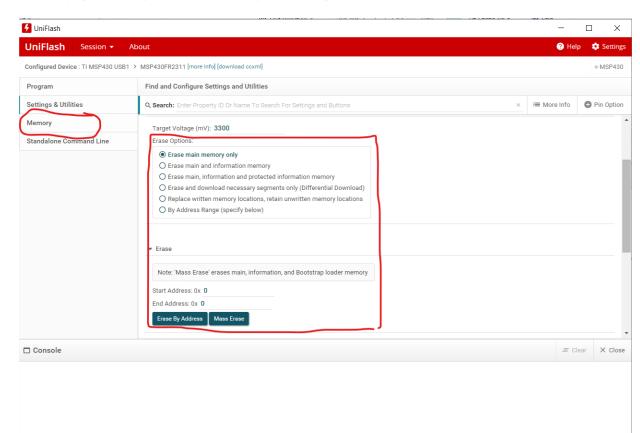

# 2.程序烧录与校验,配置信息的保存与导入

- 1. 通过Flash Image(s) 的browse选择烧录的 文件。文件生成方法: 链接
- 2. 通过Load Image烧 录文件,通过Verify Image校验文件

3. 烧录信息与校验信 息见Console栏

# 3.擦写程序与读取代码

1. UniFlash提供擦写memory功能,在MassErase的上方EraseOptions区域里设置

2. 要查看内部数据, 点击侧边栏的Memory

# 4. 报错说明

1. 未识别烧录工具,检查烧录工具是否插接正确,确保设备管理器能正确识别。仍不成功,请安装 <u>USB驱动</u>,并插拔烧录工具,重启电脑。

2. UniFlash与烧录器的软件版本不匹配,建议选择Update,等待时间较长。

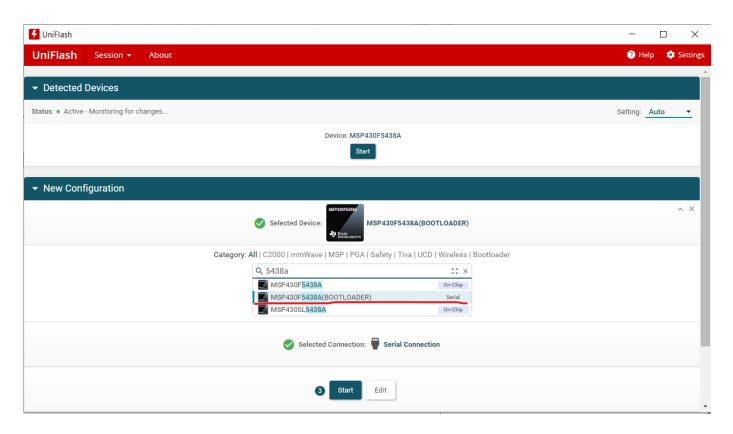

3. 未识别MSP430。请检测MSP430是否与烧录工具连接正确,且供电正常。

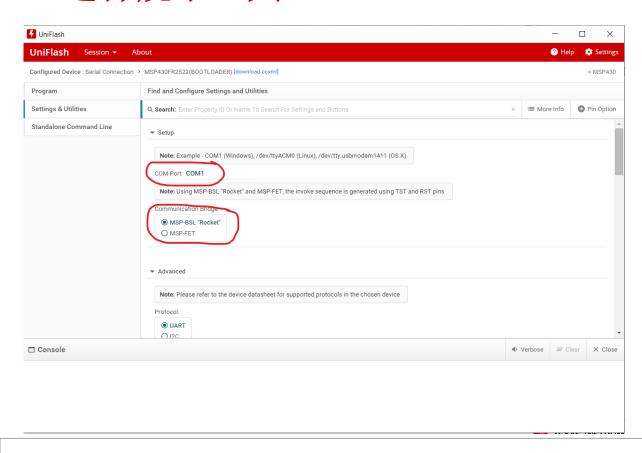

# 使用MSP-FET / Rocket通过Bootloader连接

# 1. MSP430型号配置

1.选择对应MSP30 的bootloader,只支 持UART。硬件上确 保RST,TEST,RX, TX四根线连接正确。

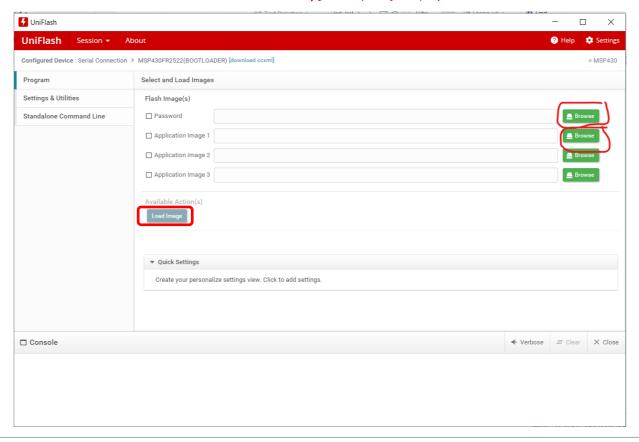

# 2.选择烧录工具

1. 选择对应的COM口

2. 选择对应的烧录工具

# 3.通过Bootloader烧录程序

1. 导入Password(可选)

2. 导入Application Image1

3. 点击Load Image烧录程序

# 4.报错与烧录成功说明

#### Error!

Image loading failed: Flash Generic, Loading Images... Error: -6

### Error!

Image loading failed: Flash Generic, Loading Images... Error: -9

#### ☐ Console

1. COM口配置错误。

2. 烧录工具选择错误或硬件连接有误。建议用示波器抓取通讯线的波形。

3. 烧录成功。
